SOCIAL STRATEGIES

Social media is a great business tool, but without a strategy it's like navigating uncharted waters without a map: frustrating, time consuming and inefficient.

A social media strategy determines which social media channels you should be concentrating on and how they should be managed to really drive business.

A strategy is designed to be implemented immediately, and aims to deliver improvements in a 1 to 6 month timeframe.

In addition, it is expected to provide a sound platform for further growth. Its aim is to ensure that your business gets the most bang for buck – enabling you to maximise the effectiveness of your marketing with the resources at your disposal.

In a social strategy we cover the below areas:

- Situation Analysis – who you are
- Target Audience – who you want to reach
- Goals & Objectives – what you want to achieve
- Strategies and Tactics – how you will achieve it
- Actions – who does what and when
- Controls – how do you know when you got there
